

Coding & Solution

Date	28 September 2026
Team ID	SWTID -2026-7718
Project Name	AI Study Buddy
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/24bsccs51-savi/Ai-Study-Buddy.git
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Flask
Key Features Implemented	AI-based study assistance, question answering, study material support, personalized learning guidance, and simple user-friendly interface.
Pending / Incomplete Features	Advanced personalization, voice-based interaction, and additional AI features can be implemented in future versions.
Setup / Run Instructions	Install Python and required libraries. Open the project folder in VS Code and run the Flask application using <code>python app.py</code> . Open the displayed localhost URL in a web browser.

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

AI Study Buddy is designed to support students in their learning process by providing quick study assistance and personalized academic guidance. The application focuses on a simple, user-friendly interface and can be further enhanced with advanced AI features, voice interaction, and personalized learning recommendations.
