

Project Executable Files

Date	28 September 2026
Team ID	SWTID-2026-7718
Project Name	AI Study Buddy API
Maximum Marks	3 Marks

Project Executable Files

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA – Local Project
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA – Web Application
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA – Local Development
Login Credentials (Demo)	Demo credentials to be provided during evaluation
Platform / Hosting Provider	Localhost
Repository Link	https://github.com/24bsccs51-savi/Ai-Study-Buddy.git
Demo Video Link	https://drive.google.com/drive/folders/1pDMqROJXhnpQUc-Z6qaDZWg6wFjb6oK5

Step 4: Run Instructions

Prerequisites:

- Node.js installed
- MongoDB installed/running
- Visual Studio Code
- Git

Steps:

1. Download or clone the AI Study Buddy project.
2. Open the project folder in Visual Studio Code.
3. Open the terminal.
4. Install the required dependencies:
`npm install`
5. Create a .env file based on .env.example.
6. Configure the MongoDB connection and required environment variables.
7. Start the backend server:
`npm start`
8. Start the frontend application according to the project's frontend configuration.
9. Open the application in a web browser.
10. Register or use the provided demo account to access the system.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI response may depend on the availability and response time of the AI service.	Check the AI service/API connection.
2	Large study materials may require additional processing time.	Upload appropriately sized files.
3	The current system is primarily designed for normal student usage.	Future versions can improve scalability for larger numbers of users.
